Thanks for downloading!

In this package, you'll find the wallpaper files for all seven redesigned macOS releases. Within each folder is a light, dark, and dynamic version.

To have your Mac automatically switch between the light and dark styles based on your appearance, set the dynamic image as your wallpaper and make sure your wallpaper system settings menu has 'Automatic' selected.

Not at all required, but if you would like to post anything on social media about these wallpapers, it would mean a lot! You can tag me on Instagram as @trevor.photos or @trevor.graphics, or on Threads as @trevor.photos.

These wallpapers are for personal use only. Do not copy, modify, or redistribute. If you have any questions, reach out to hello@trevor.graphics for more information. If you would like to share these wallpapers with a friend, please send them the link to my site.
